Are you or someone you know aged under 65 and concerned about dementia?

It is a good idea to speak to your GP if you start to notice

- Changes in behaviour and personality
- Memory issues
- Problems with balance and movement
- Communication issues
- Visual and spatial problems
- Changes in ability levels and skills

If you have any cause for concern, visit your doctor and discuss your concerns with them. Seeing a doctor early can reduce the anxiety you may be feeling and help you find answers.
