are holding their tenth support group meeting for people with Posterior Cortical Atrophy (PCA) and their carers on:

Thursday 25th January 2018

2.00pm - 4.00pm

Barkham Day Hospital

Wokingham Hospital, Barkham Road, WOKINGHAM, RG41 2RE

I am delighted to tell you that our speaker joining us for this meeting will be Dr Keir Yong a research psychologist at the Dementia Research Centre, University College London. His interests lie particularly in investigating perceptual impairment experienced by individuals living with neurodegenerative conditions, ultimately to develop aids and strategies to minimise the effects of such impairment.

Dr Yong will be talking about Read-Clear a tablet App designed to assist reading in people with posterior cortical atrophy (PCA) and other degenerative conditions that impair vision. It allows the personalisation of various features of text presentation to alleviate the effects of certain visual symptoms that may particularly interfere with reading for people with PCA:

- Visual disorientation (e.g. getting lost in the page)
- Visual crowding (e.g. words cluttering up)
- Oculomotor apraxia (e.g. difficulties following text along a line)

People living with PCA and their relatives have taken an active role in its development, along with scientists and clinicians at University College London.

Tea, coffee and light refreshments will be served. We do hope you can join us.

Please RSVP by Monday 22nd January 2018 to:
