are holding their sixth support group meeting for people with Posterior Cortical Atrophy (PCA) and their carers on:

**Thursday 26th May 2016**

2.00 pm - 4.00pm

Barkham Day Hospital

**Wokingham Hospital, Barkham Road, WOKINGHAM, RG41 2RE**

We are delighted to announce that we have two speakers for this support group meeting:

Animator Simon Ball, in collaboration with Neuropsychologist Sebastian Crutch, is developing an animated documentary film investigating people’s experiences of Posterior Cortical Atrophy (PCA). The project is an attempt to capture and record the specific effects of PCA on everyday lives. Through animation, the film will bring to life the changes in perception that are caused by PCA, which are often invisible to others.

Amelia Carton is a research assistant at the Dementia Research Centre, UCL, with a background in psychology. She specialises in research focusing on people with visual impairment due to changes in the brain, rather than the eyes, and is particularly involved with the Seeing What They See study which aims to develop aids and strategies to assist individuals living with dementia-related visual impairment. She will be presenting the 'Profiles in Paint' project where people with PCA and other rare dementia diagnoses produced a still life painting from the same objects, in collaboration with the visual artist Charlie Harrison.

Tea, coffee and light refreshments will be served. We do hope you can join us.

Please RSVP by 23rd May to:
